**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION*****Drawings***

1. The drawings are objected to because only Figures 1-5 have been filed with the application. Figure 6 is missing. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Specification***

2. The abstract of the disclosure is objected to because the language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc. Correction is required. See MPEP § 608.01(b).

3. The disclosure is objected to because of the following informalities:
  - “the tool box B” (page 3, line 34) needs to be changed to the --tool box T--.
  - “now had to” (page 4, lines 4 and 25) needs to be changed to --now to--.
  - “downward extending lip 42” (page 3, line 27) needs to be changed to --downward extending lip 40--.
  - “transfer/registration pin 34” (page 3, line 34) needs to be changed to --transfer/registration pin 36--.
- Appropriate correction is required.
- Claim Objections***
4. Claim 2 is objected to because of the following informalities:
  - Regarding claim 2, “a pickup” (line 2) needs to be changed to --a pickup truck--.
- Appropriate correction is required.
- Claim Rejections - 35 USC § 112***
5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
6. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, “said gasket of a standard width and trimmed to fit” (lines 6 and 7) is not clear. What is meant by “said gasket of a standard width and trimmed to fit”?
- Allowable Subject Matter***
7. Claims 2-5 are allowed.

8. The following is a statement of reasons for the indication of allowable subject matter:

The recitations of the specific features of the method of releasably mounting a tool box to the back of a pickup in claim 2 including especially the construction of placing a plurality of registration pins vertically mounted in the chassis rails and extending through the gasket of is not taught nor is fairly suggested by the prior art of record.

The recitations of the specific features of the tool box means for releasably securing a tool box in the bed of a pickup truck in claim 3 including especially the construction of the plurality of registration pins to be placed in the bores in the rails to make an impression in the underside of the proposed tool box is not taught nor is fairly suggested by the prior art of record.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The cited references show several other tool box mounting means similar to that of the current invention.
